

## POWERPACKER – first delivery with SIGNODE SMB

To cater the accelerated demand for highly automated machines, BAHMÜLLER is now offering the successful POWERPACKER also with the SIGNODE CORIN.

With this step, the leading companies of the bundle / strapping machines (manufacturers) are available for selection. Make your choice: ATS, Mosca or Signode.

The first combination of this machine type is producing in Northern Bavaria.

Not least due to the pandemic and the already large shortage of skilled workers, more customers request for fully automated SFG lines.

BAHMÜLLER is looking forward to boosting your output with our BOXFLOW® SOLUTIONS
